

# ELECTRONICS TECHNICIAN (m/f/d) FOR DEVICES AND SYSTEMS

With your technical expertise as an electronics technician, you support our hardware production in the assembly and commissioning of our diagnostic, communication and test hardware. You are enthusiastic about prototype construction. With your skills, you also support us in the creation of documentation for production. In accordance with your high quality standards, you consistently and reliably test the functionality of the manufactured assemblies and devices.

## Your tasks

You are responsible for the self-reliant production and commissioning of the devices and their assemblies.

You are responsible for the self-reliant diagnosis and repair of the devices and assemblies.

You will carry out PC-based quality control and document the results.

## Your profile

You have a completed apprenticeship as an electronics technician for devices and systems or an equivalent qualification.

You have practical experience in the areas of SMD soldering, crimping, circuit board assembly and module production.

You also have experience in device assembly, software installation and device commissioning.

You have knowledge of microcontroller and circuit technology.

You are familiar with measurement and testing technology, error analysis and the repair of circuit boards.

You are confident in the use of Microsoft Windows and Office.

Your written and spoken German skills are good, English skills are also an advantage.

## Our offer

We provide you with a secure job in a future-oriented, family-run company.

You will find a family-friendly working environment at our house, including company events, flexible working hours and a company kindergarten.

We will comprehensively train you and support your long-term professional and personal development.
