SOFTWARE DEVELOPER CLOUD (m/f/d)

DSA specialises in innovative communication solutions for vehicle electronics. With our teams of experts, we deliver modular software and hardware solutions for the entire life cycle of vehicles. For our cloud platform in the area of vehicle production, you will be responsible for the integration and implementation of existing customer applications and operating processes. You will support us in fulfilling the highest system availability and reliability requirements for our customers, the major players in the automotive industry, worldwide.

Your Tasks

In our interdisciplinary team, you will develop complex software solutions for the future.

You will develop microservices that are part of a complex production control system and support our customers in defining requirements.

In addition, you will develop an automated cloud deployment for initial installation and continuous updates for Amazon AWS.

You will push our system solutions by proactively contributing your own expertise.

Our Offer

We have flexible working hours and you have the opportunity to work remotely.

We organise regular company events and there is a job bike for your mobility.

In our growing, globally positioned company, you will find creative freedom in an exciting environment.

We have a modern working culture with a flat hierarchy, short communication channels and individual development opportunities.

We also offer free coffee and an incredible view of the Eifel.

Your Profile

You have a degree in computer science, business informatics or a comparable qualification, which can also be acquired in a corresponding professional activity.

Ideally, you have 2-3 years of professional experience in dealing with AWS Cloud or you are very willing to familiarise yourself with the topic independently.

Your knowledge of Kbernetes and AWS Cloud services (EKS, RDS, AMQ, ...) is very good.

You have good knowledge of Java and Spring Boot.

You have in-depth knowledge of several of the following frameworks and technologies:

- Postgresql, Oracle
- ELK Stack
- CI/CD (Jenkins, Terraform, Ansible)
- Python
- Bash

Your written and spoken English and German skills are good.

These qualifications and skills may also help you to score points:

- Certifications in AWS
- Knowledge of CI/CD under Amazon AWS
- Web technologies, such as HTML5, CSS, JavaScript, Angular, Responsive Design

---
