

STUDENT ASSISTANT (m/w/d) FOR ELECTRONIC / MECHATRONICS

From the high-voltage battery to the vehicle cockpit, complex vehicle components are subject to the strictest quality requirements. In this context, DSA develops and supplies electrical and electronic (E/E) test systems and thus enables automotive manufacturers and Tier 1 suppliers to produce vehicles in large quantities while maintaining the highest manufacturing quality. To support our highly qualified team, we are looking for committed and resourceful student employees who are enthusiastic about our products and the challenges of our customers and who want to get involved in exciting development projects and contribute to great solutions.

Your Tasks

You support our interdisciplinary team in the development of advanced test solutions.

You will be involved in the development of innovative products that thoroughly test vehicles and components during and after production and ensure quality and reliability.

You develop internal validation set-ups for the acceptance of customer-specific test systems.

You carry out validation tests and thus ensure that we only provide our customers with the highest quality.

Our Offer

Extensive training and an interesting working environment: with us you can also develop on the „playground“ and we never run out of exciting topics.

Short communication channels in a flat hierarchy.

A lot of support from colleagues who have been with the company for many years and have a high level of technical expertise.

Highly topical issues and development tasks in the area of the automotive future.

Exciting and varied activities and the opportunity to write your bachelor's or master's thesis.

The opportunity to organise your working days according to your university schedule.

Your Profile

You are studying electrical engineering, mechatronics or a comparable subject (B.Sc./M.Sc.).

You are eager to expand and deepen your knowledge in electrical engineering / mechatronics.

You enjoy „trying things out“ and finding pragmatic solutions for new and old problems.

DSA compact:

Business Areas

Vehicle development
Production
After-sales
Connected vehicle
Logistics and quality assurance

Customers
