

SYSTEM ENGINEER VEHICLE PRODUCTION (m/f/d)

You shape the quality and the reliability in the automotive production with us. You are the direct contact person for the technical support of our customer in KVASINY/CZECHIA and you manage demanding system integration projects. As a link between our development engineers and our customers, you contribute significantly to the continuous optimisation of our system solutions.

Your Tasks

From your base of operations in Aachen, you will maintain a close customer contact and ensure smooth execution of all processes.

In regular direct exchange with our customer on site, you will oversee the use of our system in the ongoing automotive production.

With your excellent know-how, you will continuously monitor and optimise our system.

You look for new ways to efficiently implement processes, test procedures and the system integration. Thus, you will actively shape the automotive production of tomorrow.

Your Profile

You have a degree in engineering (FH/TH), electrical engineering, computer science, mechatronics or a comparable qualification.

You bring programming skills, e.g. Java, C ++.

Your good organizational talent and your independent mode of operation complete your profile.

You convince with good communication and presentation skills.

You have a class B driving license.

You enjoy travelling and appreciate moving regularly between your various locations at the headquarters in headquarters in Aachen and in Kvasiny/Czech Republic, which can also involve stays of several months on site.

Good knowledge of English.

An additional plus is a good knowledge of another foreign language, ideally Czech.

Our Offer

An interesting work environment and state-of-the-art topics in the field of the automotive future.

An attractive customer environment from the international automotive industry.

Exciting and varied activities with individual development opportunities.

A detailed introductory job training.

Creative leeway and short communication channels in a flat hierarchy.
