

SYSTEM ENGINEER FOR LINUX SERVER (m/f/d)

You are the direct contact person for the technical support of our customers at different locations on site and remote. As a link between software development and customers, you will get to know different people and various approaches to work. You support complex backend systems that ensure quality and reliability in the vehicle production of major automotive manufacturers.

Your Tasks

As part of our interdisciplinary team, you will be involved in the realization of innovative software solutions of the future.

You commission sophisticated server systems and, when applicable, you also make sure that customers receive thorough training on our software.

With drive, you will actively shape the automotive industry of tomorrow by looking for new ways to efficiently implement processes, testing procedures and system integration.

Our Offer

A detailed job training and an appealing working environment.

State-of-the-art topics in the field of the automotive future.

An attractive customer environment from the international automotive industry.

Exciting and varied activities with individual development opportunities.

Creative scope and short communication channels in a flat hierarchy.

Your Profile

A degree in technical studies or a vocational training as IT in specialist system integration.

Very good Linux and network skills.

Basic knowledge of database systems (PostGres, Oracle).

High willingness to travel and intercultural competence.

Good organizational talent and independent mode of operation.

Good communication and presentation skills.

Full Clean Driving License.

It is advantageous to have knowledge of a foreign language, such as English, French or Spanish.
